TO: Minerals File

FROM: Tony Gallegos, Reclamation Engineer *da ef*

RE: Site Inspection, Steve Powell, Chimney Rock Project, E/015/063, Emery County, Utah

FILE S/015/066 (handwritten in red, with an arrow pointing to the file number in the RE line)

Date of Inspection: October 19, 1995
Conditions: Clear skies, warm
Participants: Tony Gallegos, DOGM

Purpose of Inspection: To examine the project site for evidence of reclamation or disturbance

This project is located near the remnants of an old railroad grade. The exploration project area, as indicated on the map submitted with the notice, contains no visible signs of exploration drilling described in the notice. A photograph was taken of the project area, looking to the northwest towards Chimney Rock. There were signs of bull dozer activity in the railroad grade area, but no signs of exploration drilling away from the dozed area. A majority of the project area as described in the notice, was walked. No signs of exploration drilling were found. Either the drilling never occurred in this area, or the operator conducted excellent reclamation.

This exploration notice is overlapped by the Chimney Rock II project, file S/015/066. The dozer disturbance is believed to be associated with that file.
